KELERENG

Permainan ini lazimnya dimainkan oleh kanak-kanak lelaki berumur enam tahun ke atas samaada secara individu atau berpasukan. Peralatan yang digunakan adalah rim basikal tanpa jejari dan juga 'patuk sangga' atau sebatang kayu berukuran 50 sm panjang. Lazimnya dimainkan di tempat-tempat lapang seperti padang, halaman rumah yang rata ataupun melalui jalan-jalan kampung. Jika dimainkan secara berpasukan, lorong-lorong larian berukuran enam kaki lebar sejauh seratus kaki akan disediakan untuk kedua-dua pihak.

Undian akan dijalan bagi menentukan giliran pemain yang akan memulakan permainan. Pemain-pemain dikehendaki mendorong rim setelah diberikan isyarat dengan menggunakan 'patuk sangga' mengikut lorong masing-masing dari garis permulaan hingga ke penamat. Pemain boleh menangkap rim apabila rim menuju atau masuk ke lorong lawan. Jika rim terjatuh, pemain hendaklah mendorong semula dari tempat rim itu terjatuh. Kemenangan diberikan kepada pemain yang tiba terlebih dahulu ke garisan penamat ataupun pemain pihak lawan terbatal dan dibuang gelanggang

KELERENG

This game is usually played among boys aged six and above, either as individual or in teams. The apparatus required are a bicycle wheel rim without the spokes and a short stick about 50 cm long. It is generally a game for the outdoors and is played in any open space, the compound of a house or along quite village lanes. If played as a team game racing lanes about six feet wide and about a hundred feet long measured and marked out for both teams.

After the team have been selected and the turn and rotation of each member of the respective teams have been determined the race is begun. Each player is required to guide the bicycle wheel with the stick from the starting point to the finish without straying into the opponent's lane. The players are allowed to handle the wheel in case there is danger of it straying out of its lane or failing. The winner is determined by the first racer to reach the finish line or fi the opponent is disqualified for an infringement.

Rim basikal tanpa jejari.
Bicycle rims without spokes.
