Kain Kulit Kayu

Wooden Bark Clothing

Pakaian kulit kayu merupakan pakaian masyarakat Zaman Neolitik dan pakaian ini juga digunakan oleh masyarakat pribumi. Kulit kayu yang dipilih akan ditumbuk menggunakan alat batu (penumbuk kulit kayu) sehingga kulit kayu tersebut menjadi lembut dan halus.

Clothing made of wooden bark was the typical attire worn by people during the Neolithic Age and was also commonly worn by indigenous communities. The selected bark would be pounded with a stone tool (wooden bark beater) until it becomes soft and smooth.
